

# Integrated Balustrade system

## Glass balustrade, integrated in the frame

The **integrated balustrade system** allows a tempered glass slab to be inserted into the aluminium frame profile of the French window. This solution offers the advantage of increasing brightness inside the apartment by using a French window instead of a window, thus significantly increasing the glass surface. The building has a modern, austere look thanks to the perfectly symmetrical windows. The parapet has reached the maximum degree of soft body impact resistance (Class 5).
